Career Objective

To obtain a position that diligently works towards delivering high-quality end products and to utilize my technical skills and problem-solving capabilities to contribute to the organization's success.

Skills

Languages/Tools: HTML5, CSS3, JavaScript, Core Java, C, C++, SQL, Data Structures
Technologies: React.js, Node.js, Express, MongoDB, Git, REST APIs, Responsive Design

Projects

MockMate — AI-Powered Mock Interview Platform

A web-based platform designed to simulate real-time job interviews using AI. It leverages NLP and speech-to-text to assess user responses and provide feedback. Built with Next.js, Node.js, MongoDB, and OpenAI Whisper, it helps users enhance their interview readiness.

Rentflix — Online Movie Rental Platform

Rentflix is a full-stack movie rental web app built using the MERN Stack. It allows users to browse, rent, and stream movies with an intuitive and responsive interface. The platform focuses on delivering a smooth user experience with dynamic content and modern UI design.
